

CHRISTMAS CODING

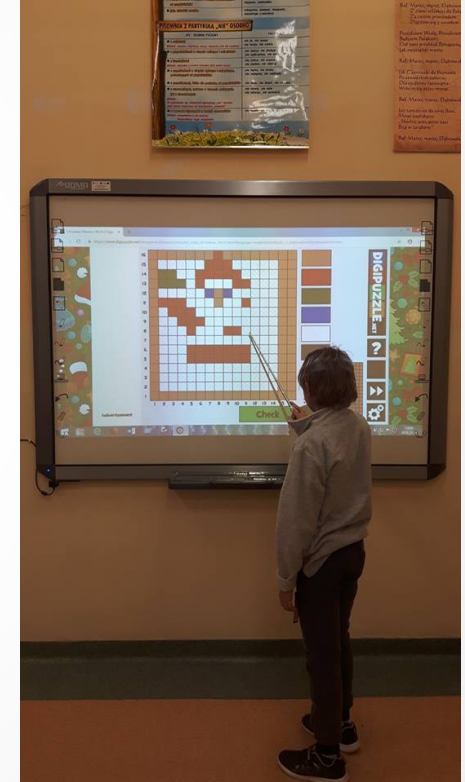

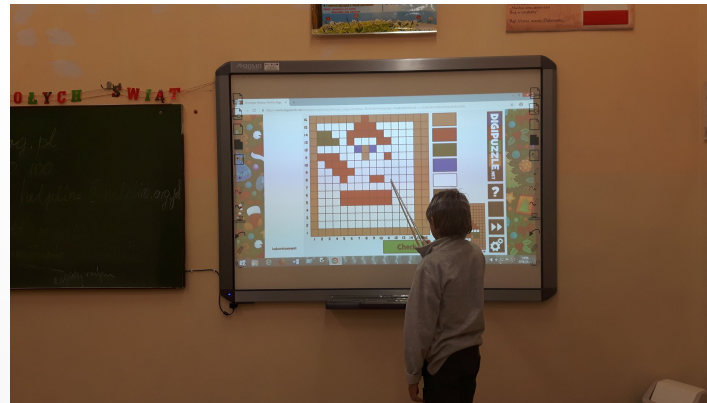

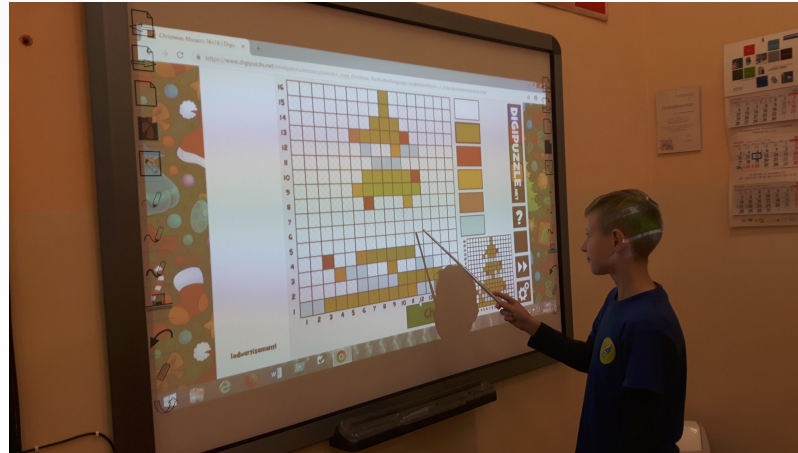

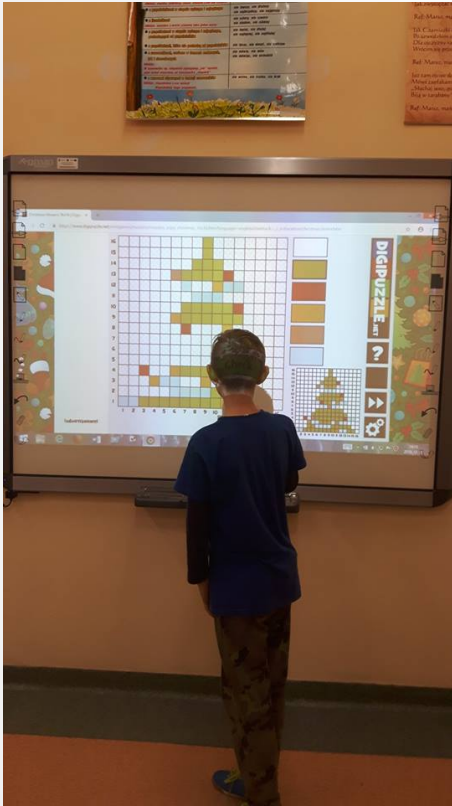

Christmas at the Primary School No 2 in Elk
Poland

CHRISTMAS CODING

- In our school students eagerly joined CHRISTMAS CODING. During the didactic-compensatory classes, maths innovation classes and English lessons students coded using an interactive whiteboard: they solved a difficult Christmas sudoku, played Christmas Tic Tac Toe and coded the drawing mosaics. Learning through play was pure pleasure!

Christmas Codning

CHRISTMAS CODING

Innovation of English with elements of Christmas coding!

This time students had the opportunity to follow instructions (a code) and make Christmas Crackers - cardboard rolls containing surprises, packed in colored paper, in a manner reminiscent of a big candy, which is a traditional element of Christmas parties and Christmas dinners in Great Britain. Now we know that coding can be easily combined with a culture-learning English lesson!
